

ARWA's Water & Wastewater Operator Certification Examination Preparatory Training Program

The Alabama Rural Water Association Water and Wastewater Operator Certification Examination Preparatory Training Program has been in place for more than 25 years. During that time the ARWA has assisted hundreds of individuals in obtaining their State of Alabama water and/or wastewater operator certifications. The ARWA employs well known, respectable instructors with several years experience in the water and wastewater fields. These instructors bring with them knowledge in the technical and managerial aspects of the water and wastewater industry as well as being certified water and wastewater operators. Each instructor is supplied current and updated information regarding the course materials to be presented.

Individuals must attend 100% of each course for substitution of required experience credit purposes for operator certification. It is the responsibility of each individual attending an ARWA Water or Wastewater Operator Certification Exam Preparatory Training Course to comply with the ADEM Division 10 Regulations as they apply for certification examination and operator certification requirements. Course Manuals are sold by the ARWA separately from the class tuition fee. We strongly recommend that each student or water system purchase the necessary manuals to help in the exam preparation process.

Tuition Fee for the course below follows:

45 hour Wastewater Course - \$500.00 per student* (Recommended for Grade III-IV Wastewater Operator Certification)

Enrollment Fees **do not include the cost of course manuals and other training materials.*

Course start date to be determined. This class is subject to being canceled or delayed if the minimum number of students are not enrolled and paid in full.

The ARWA is currently registering individuals for the following Wastewater course in your area.
